

Memory and CPU Usage Benchmark – Test Medium

This benchmark evaluates the memory and CPU usage of the ``test_medium`` program when compiled with three compilers: Clyte, GCC, and Clang. The results are based on 5 runs using ``/usr/bin/time -v`` and ``perf stat``.

Clyte Results

Metric	Average Value
Avg User Time	0 s
Avg System Time	0 s
Avg RSS	1740.800 KB
Avg CPU Cycles	686617.600
Avg Instructions	877559.600
Avg Context Switches	0

GCC Results

Metric	Average Value
Avg User Time	.018 s
Avg System Time	.008 s
Avg RSS	20844.000 KB
Avg CPU Cycles	68612725.200
Avg Instructions	99220844.600
Avg Context Switches	0

Clang Results

Metric	Average Value
Avg User Time	.016 s
Avg System Time	.024 s
Avg RSS	83456.000 KB
Avg CPU Cycles	93598233.200
Avg Instructions	106904821.000
Avg Context Switches	0
